2020 Census Responses Reach Milestone

Across the U.S., 60 percent of all households have responded to the 2020 Census. That is 88,700,000 responses. [Watch](#) this short video, which can be shared on social media, featuring U.S. Census Bureau Director Steven Dillingham as he commemorates this milestone.

Response Rate Fun Facts

- Utah had the second highest cumulative Internet self-response rate at 58.9 percent, behind Minnesota
- Utah was second for all Western states with a cumulative total self-response rate of 63.7 percent
- Custer County, CO and Slope County, ND tied for highest daily total self-response at 0.2 percent each
- Los Alamos County, NM had the highest cumulative Internet self-response rate at 74.3 percent
- Los Alamos County, NM was the top west county by area with a self-response rate of 79.3 percent

Update: Census Bureau to Resume Some 2020 Census Field Operations in Additional Locations

In coordination with federal, state and local health officials, the Census will begin a phased restart of some field operations starting the week of May 25. With the addition of these ACOs resuming operations, 90 percent of the nation's Update Leave will have resumed. Below are the ACOs resuming operations. Read more [here](#).

Update Leave

Recently, the Census Bureau has resumed delivery of response packets in many areas that do not receive mail directly to their home. Please respond using your Census ID number to complete your census form online, by phone or by mail. If you responded without your Census ID number, we may not be able to match your response with where you live. This may result in the need to visit you in person to collect your data.
