CITY OF HALLSVILLE

Public Notice to Boil Water in Your Area

Due to a main line break and reduced distribution system pressure The Texas Commission on Environmental Quality (TCEQ) has required our Water System, Permit No.1020004, to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc.) Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions).

Only for customers that live on Belle Riva Drive

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes.

In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice. Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses).

If you have questions concerning this matter, you may contact Rickey Dugger at 903-668-2313 or 903-930-5900.
